

VS Code setup for TapeMeasure

Linux

Ubuntu

1. First thing your going to want to do is **download the .deb** to the [VS Code download site](#). If you download the the .rpm file you will need to follow another guide.
2. Once the file has finished downloading you will want to **open up your files software and navigate to your downloads folder** or whenever you have set your browser to download.
3. Right click and then **Open in terminal**.
4. **Press Tab and Enter:**

```
sudo apt install ./code
```

5. Once the install has finished you will want to open up VS Code and then **Open folder** and you will want to find your Spot-SDK folder or workspace folder.

Windows

Windows 10/11

1. First thing your going to want to do is download the windows installer to the [VS Code download site](#).
2. Once the file has finished downloading you will want to run the installer.
3. Once the install has finished you will want to open up VS Code and then **Open folder** and you will want to find your Spot-SDK folder or workspace folder.
